The Queen's Club, founded in 1886 in West London, was reputedly the world's second multipurpose sports complex (following Prince's Club), before moving up to first place when Prince's moved and lost its outdoor facilities. Adding its squash courts in 1905, it was at the forefront of inter-club competition in the early years of last century. Details in 'Squash Then And Now' (<https://www.squashlibrary.info/squash-a-celebration>)

When Sheffield's Abbeydale Park and Hallamshire clubs hosted the World Masters 1999, the championship programme outlined their histories from Abbeydale's opening in 1934, and courts added at Hallamshire in 1970. Abbeydale was the home for the British Open 1972-4, the British Nationals later that decade, and they jointly hosted the British Junior Open. <https://www.squashlibrary.info/general-resources> for the details.

ABBEYDALE PARK SQUASH CLUB

Formed on the 25th February 1934 this historic club is amongst the oldest in Sheffield and steeped in tradition. Its first court cost of £2250, which members' subscription covered from 1st October 1934.

Since then five more courts have been added and work commenced on the new building in the city in April 1971. At this stage the building was a venture of faith, for the building was blessed in advance that it would be suitable for championship play.

It was officially opened by the Marquis of Zetland, the President of the SRA, on the day 30th October in 1971. The SRA announced short notice that the club had been officially approved for championship play and Benson and Hedges British Squash Championships, 1971-2.

HALLAMSHIRE TENNIS & SQUASH CLUB

The club was founded in 1907 as the Sheffield and Hallamshire Tennis Club and was composed of fourteen grass courts. It was not introduced to the city until November 1970 when two courts were opened. The building was then renamed Hallamshire Tennis & Squash Club.

In these founding years the courts could only be used by crossing a red shale to the courts requiring players to wear special shoes in the corridor. Heating was also very expensive, to such an extent that in winter it was not uncommon for players to wear several layers of clothing.

The club is now a far cry from these early days. Six more courts have been added along with new and updated facilities such as a gym and a crèche. The most recent addition was a

Although squash had arrived in the United States earlier, (beginning at St Pauls School in Conover, New Hampshire and in private homes); Christmas Day 1900 was a landmark date for squash in USA.

It was on this date that the first court built at a club was opened. It was at the Racquet Club in Philadelphia at their original Walnut Street location. Slightly smaller than the standardised dimensions, and built entirely of wood for \$500, it proved to be an instant success.

This prompted the club to add three more courts two years later. Again, space constraints meant that they were slightly smaller than the standard 32' by 21'. Unlike the first, they were primarily cement constructed, including the floor, with only the front wall being wooden. The building costs had risen to \$1,630! [US SQUASH](#)
