The 1987 French Open saw a number of experimental rules used. PAR scoring (to 15 points), one serve, the front wall cut-line removed and the tin lowered to 17"/43cm. Excepting cut-line removal, the three changes fed into the pro-game - although scoring later moved from 15 to 11 point games. [Squash - PSA World Tour](#)

In 2004 a landmark joint World Squash Anti-Doping Code was signed between the World Federation (WSF) and the Men's & Women's Pro Tours (then PSA & WISPA). The three associations published a common code in their regulations so that testing and penalty procedures became jointly administered. At that time the Director General of WADA, the World Anti-Doping Agency, stated "Squash has set an example of how professional organisations and leagues can work hand-in-hand with an International Federation to use the Code as the basis for the fight against doping in sport. It is an example we at WADA would encourage all professional organisations and leagues around the world to follow." World Champions Nicol David & Nick Matthew seen here promoting 'clean sport' in 2011. [Squash - PSA World Tour](#)

In 1968 after having been hit in his left eye by a racket causing loss of vision, Dr E.D. Kerr of High Wycombe in England had a metal protective mask made. His prototype was not taken up - probably because it would seem that protection was limited, especially with holes wide enough for a ball to pass through. (As from 1 January 1999 WSF mandated that all Juniors and Doubles players were required to wear protective eye-guards during competition play).

During 1998 the standard age groupings for juniors moved from Under 12, 14, 16 & 19 to become primarily Under 13, 15, 17 and 19. This reduced the possible nearly three year gap that had banded players who had just turned 16 with those close to their 19th birthday.

When the World Federation was formed in 1967, the Davis Cup Tennis Regulations were adopted to cover player eligibility. At that time there was opposition expressed about allowing qualification through residence, but shortly after when squash-specific Rules were compiled the first Regulation insisted upon residence for the two years before the event date, and four of the last five years. This was changed to four years, and then in 2008 reduced to three years to gain a residential qualification. [World Squash Federation](#)

Washington has seen change this week, but also when the World Federation held its 1986 AGM there! The meeting reduced the top junior age from 19 to 18 (the bands became U12,14,16,18). But 2 years later U19 was reinstated, and in 1998 age groupings changed to U13,15,17,19.

The great setting of Shanghai's famous Bund for the September 2015 China Open saw the first women's Tour event experimenting using the lower 17" (43cm) tin, the same height as for the Men. The test events led to formal introduction of 17" tins for Women's PSA Tour events at the beginning of 2016. [Squash - PSA World Tour](#)

Before Federations moved over to 'random draw' at points during the late 1970's, knock-out draws used pre-ordained seeding positions. So, for example, the number one seed would expect to meet the 16, 8 and 4 before the final. However, the 8 would have to battle past the closely rated 9, and the 4 would face 5. Then the winners would face off in another tight match. Not only would this 'protect' the top seed, but where draws tend to repeat e.g. national / local titles, the same players would meet each time.
The old format:

Top half

1 v 16

] 1 v 8

8 v 9

] 1 v 4

4 v 13

] 4 v 5

5 v 12

Bottom half

] 1 v 2

6 v 11

] 3 v 6

3 v 14

] 2 v 3

7 v 10

] 2 v 7

2 v 15

In early World Team Championships, seeding was based upon the previous finishing position, with the top eight seeds being placed together in two pools - so only those teams could win. This situation was resolved after 1987 when seeds were split across all pools.

From 1 January 1989 the ISPA (now PSA) minimum commitment level for male players for ranking points division was raised to 14 events – it had generally been eight before.

Due to an increased number of available events ISPA reported '... The Board recognises the need for leading players to support sponsors and promoters on the circuit'. [Squash - PSA World Tour](#)

In 2008, WISPA (the WISPA Women's Tour, since merged with PSA), introduced a rule insisting that players had their names on the back of their playing top to help spectators and broadcast viewers identify them when on court.

September 2015 saw the China Open start a four month PSA trial into the suitability of dropping the tin height for women from 19" (48cm) to 17" (43cm) – the height for the men. The outcome was tin height for women Tour events going down to 17" in Jan 2016. [General play continues at 19" for all].

PSA Chief Operations Officer Lee Beachill commented: 'We feel that aligning the tin height is an important step to take in order to achieve our goals of increasing parity and offering both men and women the same playing opportunities'.

World rankings were published every two months until the separate player associations (PSA, men; WISPA women) decided that the number of events on the calendar were enough to merit monthly rankings. That point came after January 1998 for the men, and women Jan 2001. Here are the first month gap top tens, (coincidentally, Peter Nicol's debut at number one): [Squash - PSA World Tour](#)

WISPA WOMEN'S Feb-01		PSA MEN'S Feb-98	
1 Leilani Joyce	NZL	1 Peter Nicol	SCO
2 Carol Owens	AUS	2 Jansher Khan	PAK
3 Sarah Fitz-Gerald	AUS	3 Jonathon Power	CAN
4 Linda Charman	ENG	4 Rodney Eyles	AUS
5 Natalie Grainger	ENG	5 Ahmed Barada	EGY
6 Tania Bailey	ENG	6 Simon Parke	ENG
7 Suzanne Horner	ENG	7 Alex Gough	WAL
8 Fiona Geaves	ENG	8 Anthony Hill	AUS
9 Stephanie Brind	ENG	9 Del Harris	ENG

Historically, junior age bands were Under 19, 16, 14 & 12 until the mid-1980s when it was felt that a three year 16 – 19 gap was too large. It was decided to move to U18, 16, 14, 12 in 1985, but lowering the end of Juniors to U18 was rescinded almost immediately. Two year gaps introducing 17, 15, 13 to U19 became the standard in 1988.
